## TEACHING EXPERIENCE

<i>May 2016</i>	<i>Lecturer</i>	<b>Introduction to Scientific Programming in Python</b>  In this 10-week course, I taught beginning programmers data management, scientific data analysis, and programming skills in a new language (Python). Besides organizing and planning the course, I also prepared all course materials, homework assignments, and graded their final projects.
<i>Winter 2013 - Summer 2014</i>	<i>Lecturer</i>	<b>Introduction to Matlab</b>  For 3 Semesters, I taught a 2-week introduction to programming course to beginning programmers. Besides organizing, planning, and teaching the course, I also prepared all course materials and homework assignments.
<i>December 2015</i>	<i>Teaching Assistant</i>	<b>Psychophysics</b>  In this 2-week block course, I acted as tutor, providing technical and programming assistance to students programming and analysing their own psychophysics experiments in Matlab, R, and Excel.
<i>2015 - Present</i>	<i>Proofreader</i>	<b>Freelance Proofreader</b>  Proofread and Edited research papers for graduate students in medicine, neuroscience, and philosophy to programming

## RESEARCH EXPERIENCE

May 2013 - Present	Ludwig-Maximilians Universität	Prof. Dr. Anton Sirota	Programmed a 3D graphics engine in Python to build virtual reality system for freely moving rats, supervised students in programming, engineering, and cognitive science projects, organized weekly journal clubs, and ordered new equipment, trained rodents to perform behavioral tasks, and performed surgery on said rodents as part of brain research.
Aug 2012 - May 2013	Universität Tübingen	Prof. Dr. Christoph Braun	Wrote a research grant to study the top-down and bottom-up interactions by computational modeling information propagation in early sensory pathways as measured by MEG, designed and administrated an institute wiki, organized a student lecture series, and supervised two students' EEG research projects.
Nov 2011 - July 2012	Universität Tübingen	Prof. Dr. Niels Birbaumer	Programmed in Matlab a time-frequency and evoked potential analysis on three years' worth of MEG data assessing longitudinal changes in stroke patients receiving physiotherapy.
Oct 2012 - Nov 2012	Universität Tübingen	Prof. Dr. Cornelius Schwarz	Trained rats to perform whisking in response to barrel cortex stimulation viachronically-implanted electrodes, mapping stimulation sensitivity to each cortical layer.

#### INDUSTRY EXPERIENCE

<i>Technical Consultant</i>	UKT Psychosomatic Med. and Sports Med.
I evaluated and designed a solution for performing medical science studies in a placebo study, and taught the PhD student who carried out the study over several remote sessions and a few travel consultations.	
<i>Research Internship</i>	The Neuromarketing Labs
I completed set-up of an EEG laboratory, including software calibration and noise measurements. Designed and ran two experiments estimating the evoked responses of semantic agreement and price agreement, then analyzed the data. The results from the second experiment are the basis of Dr. Müller's recently-published book, "Neuropricing". Currently volunteering as an EEG consultant by giving one-day workshops on Fieldtrip, SPM, and artifact correction methods.
