GOALS

- Support open science by building tools and teaching research methodology that promotes reproducible research.
- Build technical skills in a wide variety of fields in order to perform high-quality research at institutes with limited resources.
- Obtain teaching, project management, and laboratory experience sufficient to one day become an excellent university professor.

EDUCATION

| | | |
|----------------------------|---------------------------|--|
| <i>Oct 2014 - Dec 2018</i> | <i>PhD. Candidate</i> | Graduate School of Systemic Neurosciences, Ludwig-Maximilians Universitaet |
| <i>Aug 2012</i> | <i>M.Sc. Neuroscience</i> | Graduate Training Centre of Neuroscience, Eberhard Karls Universitaet Tübingen |
| <i>May 2010</i> | <i>B.Sc. Psychology</i> | Wittenberg University |

RESEARCH EXPERIENCE

| | | |
|-----------------------------|---|---|
| <i>Nov 2018 - July 2019</i> | <i>Max Planck Institute of Biochemistry</i> | <i>Prof. Dr. Matthias Mann</i> Programmed high-throughput automated data collection and data analysis pipelines. I also designed and implemented a job-scheduling web application, implementing lean management methods to decrease data collection waiting times for 40 users and trained and mentored several biology and bioinformatics researchers in Python programming methods and open-source collaboration workflows, as well as gave introductory programming workshops for over 150 researchers. |
| <i>May 2013 - Nov 2018</i> | <i>Ludwig-Maximilians Universitaet</i> | <i>Prof. Dr. Anton Sirota</i> Programmed a 3D graphics engine in Python to build virtual reality system for freely moving rats, supervised students in programming, engineering, and cognitive science projects, organized weekly journal clubs, and ordered new equipment, trained rodents to perform behavioral tasks, and performed surgery on said rodents as part of brain research. |

INDUSTRY EXPERIENCE

| | |
|--|--|
| <i>Freelance Scientific Consultant</i> | UKT Psychosomatic Med. and Sports Med. I evaluated and designed a solution for performing medical science studies in a placebo study, and taught the PhD student who carried out the study over several remote sessions and a few travel consultations. |
